

Heating technology for adhesives

Heated case

Adjustable heated case for sachets (up to 5 pieces 620ml) or dual-component cartridges up to 415ml. Heating plate in the floor of the case. Heating control ca. +/-2°C from the set point. The case comes with a target and actual value digital display. Adjustable from 20-70°C in 1°C steps. Through the individual packaging of the sachet or the cartridge, the temperature of the item may slightly differ from the preset temperature.

Article number: HZ1003

Infrared Thermometer

The Infrared Thermometer for exact temperature measurement. ITR1944

Heated applicator

Battery driven Electroflow 18V or pneumatic gun with installed heating. The temperature is adjustable (+/-2°C) up to 228 degrees celsius with a digital display. High pressure with up to 350kg of force. The only applicator suitable for 310ml as well as 400ml cartridges.

Article number: HZ1002

Cartridge heater

Cartridge heater for 2 cartridges with an adjustable temperature range from 20°C to 160°C. Control accuracy +/- 2°C.

With a target and actual value digital display. We recommend these to preheat the cartridges for the heated applicators (HZ1001 /HR 1002)

Article number: INN1000

Caulk warmer

The COX caulk warmer allows simple use in cold environments. By heating the cartridges or sachets the viscosity gets reduced.

The caulk warmer is made from waterproof nylon material and is well insulated. Through the assistance of a self-regulating heating element a constant temperature of 35-40°C (+/- 5°C) is guaranteed.

For 12 cartridges or sachets: COX2133

For 3 cartridges or sachets: COX2134

Applicators and Service

Innotech is THE specialist in the range of applicators and adhesive accessories and offers Germany-wide the largest selection of applicators from various manufacturers. Furthermore Innotech offers comprehensive advice and a repair service for applicators.

Manual applicators
from all considerable manufacturers incl. consultation

Pneumatic applicators
For single-component and dual-component ca. 200 various models partially with performance increase

Battery-powered applicators
single-component 310-6800ml,
dual-component 50-1500ml
pressure 2,0-8,5kn

Advantages:

- More than 500 models and at least 15.000 devices in stock
- Pan-European repair service with an on-site service in Switzerland and Abu Dhabi
- Worldwide spare parts service
- Custom-built applicators
- Private Label versions
- Just in time logistics
- Stationary application
 - ✓ Assembled modular solution for stationary installation of applicators with foot-control – our partners FESTO® und Item®
- Retrofitting dosing solution with simple operation for pneumatic dispensers (FESTO)

Services in the field of sealing and bonding. For adhesive manufacturers, trade and users

Adhesive logistics

- Complete sampling logistics for adhesive & sealant manufacturers
- Warehousing at 3 locations
- → 1.800 various items → 17.000 deliveries worldwide every year
- Our customers' sales representatives receive fully packaged sets
- Bottling of samples from bulk packs in to preferred sizes
- Special website access for our customers – stocks can be viewed by users worldwide
- Pickup services for customers in Germany and abroad
- Distribution of minimum quantities for defined customer groups

Device service

- As the official service partner for PC Cox we can offer our customers a pan-European repair service, as well as worldwide spare part deliveries
- We advise you regarding the suitable applicators and assist you in solving your problems

Packaging

- We assemble for you
- o Set cases
 - o Marketing- and sales packaging
 - o and any further product arrangements

Trainings and Workshops

- Bonding-advice and training
 - o Own YouTube channel with application videos
 - o Trainings for manual applications
- Adhesions

System solution for stationary use of cartridge guns

Kit for the stationary use of almost all pneumatic dispensers from 50ml up to 1500ml by PC COX. Operation is easy via a foot switch. The frame is adjustable in all directions and is equipped with a swivel joint to simplify cartridge replacement. It enables total precision. Available now at Innotech in cooperation with our development partners: COX, ITEM, and FESTO.

Application area:

- For series that require the exact same results
- The preheat case, which warms up cartridges and sachets in advance, ensures the necessary surrounding conditions and process parameters

Consists of the following separately available components:

1. Pneumatic dispenser of your choice (COX) – incl. conversion of the dispenser for stationary use
2. Kit incl. foot switch
 - Frame small, max. height: 650mm: ITR 1952
 - Frame large, max. height: 1000mm: ITR1953
3. Retrofitting dosing solution with simple operation for pneumatic dispensers: ITR:1949

Upon request pre-assembled and ready to use (only one part has to be mounted with two screws).

Parts are also separately available (frame and foot switch). Frame small: ITR1947, frame large: ITR1948 and foot switch: ITR1946.
